

proven solutions designed
for **specialty pharmacies**

discounts & rebates, patient referrals and technology **solutions**

Today, more than ever, establishing close relationships and partnerships with Pharmaceutical and Biotech manufacturers are critical to ensuring access to products, payers and patients. Asembia is your partner in the process. Our “First to Market” specialty pharmacy contracting programs fit various pharmacy models and help our members achieve their business goals and objectives through customized programs and services that create synergy and value.

A photograph of three business professionals (two men and one woman) in a meeting. They are all wearing business attire (shirts and ties). The man on the left is looking down, the woman in the middle is looking to the side, and the man on the right is looking directly at the camera. A semi-transparent blue banner is overlaid on the bottom half of the image, containing white text.

Asembia improves the access to specialty medications through our
Prior Authorization, Financial Assistance, and Formulary Access programs.

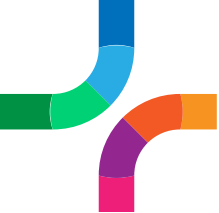

the largest **group purchasing organization** in the specialty pharmacy industry

For more than a decade, Asembia has provided the nation's most comprehensive Group Purchasing Organization (GPO) in the specialty pharmacy marketplace with an expansive portfolio of contracting solutions.

Working strategically with our diverse pharmacy membership of specialty pharmacies, alternate care pharmacies, health system and retail pharmacies we offer innovative GPO contracts, rebates, fee-for-service and other incentive based programs that help our partners achieve their business goals.

Asembia has the largest specialty pharmacy GPO contract portfolio for branded/generic pharmaceutical products, ancillary products and services.

growing your business through **patient referral** sources

The customized HUB programs from Asembia provide streamlined access for prior authorization support, insurance benefit investigation, access to financial assistance, timely status updates, and dependable home delivery.

- Patient Assistance Program Management (PAP) & Co-Pay Programs
- Patient Adherence / Compliance / Persistence Management
- REMS program adherence and reporting
- Custom Data Collection & Product Reporting
- Logistics & Product Distribution

Providing ideal solutions for a non-limited distribution products

the largest **specialty** **pharmacy network**

The Prescription Transfer Program is a single point of contact and clearinghouse for prescriptions. If a pharmacy receives a specialty prescription that they're unable to fill, they can transfer the prescription to ASPN. ASPN will find the pharmacy most suited to fill that prescription. As an additional benefit within the ASPN network, your pharmacy can receive referrals to better your business.

This network offers pharma/biotech manufacturer partners a customizable and scalable solution to develop channel management programs that are core components to any commercialization or brand-management strategy.

A close-up, slightly blurred photograph of three healthcare professionals, likely pharmacists, wearing white lab coats. They are all smiling and looking towards the right side of the frame. The person in the foreground is a Black woman with short hair, smiling broadly. Behind her is a man with dark hair, also smiling. To the left, a woman with brown hair is partially visible, also smiling. The background is bright and out of focus, suggesting a clinical or pharmacy setting.

Our pharmacy network includes specialty, retail and health system pharmacies with nationwide dispensing coverage capabilities.

a **turn-key** specialty pharmacy workflow solution

Asembia offers its pharmaceutical partners, specialty pharmacies, and prescribers a robust technology infrastructure, Asembia1. Asembia has invested significant development resources into designing a fully-integrated platform that ensures streamlined patient on-boarding and prescription intake, while concurrently providing actionable real-time reporting, prior-authorization support, interactive dashboards, and visibility for all entities involved in the overall patient journey.

Asembia1 is responsible for all aspects of patient tracking during the pre-dispense/onboarding process for a specialty prescription. As such, the platform has been designed to capture prescription status updates, log notes, and track initial patient outreach activities that may be required by drug/therapeutic category prior to the prescription being dispensed.

Asembia has developed the end-to-end prescription workflow system that supports all specialty products and therapies with real-time visibility into the lifecycle of a script.

Features include seamless on-boarding of specialty patients, streamlined prior authorization management, direct access to copay and patient assistance programs, ongoing clinical consultation and compliance monitoring, and real-time dashboards for on-demand data reporting.

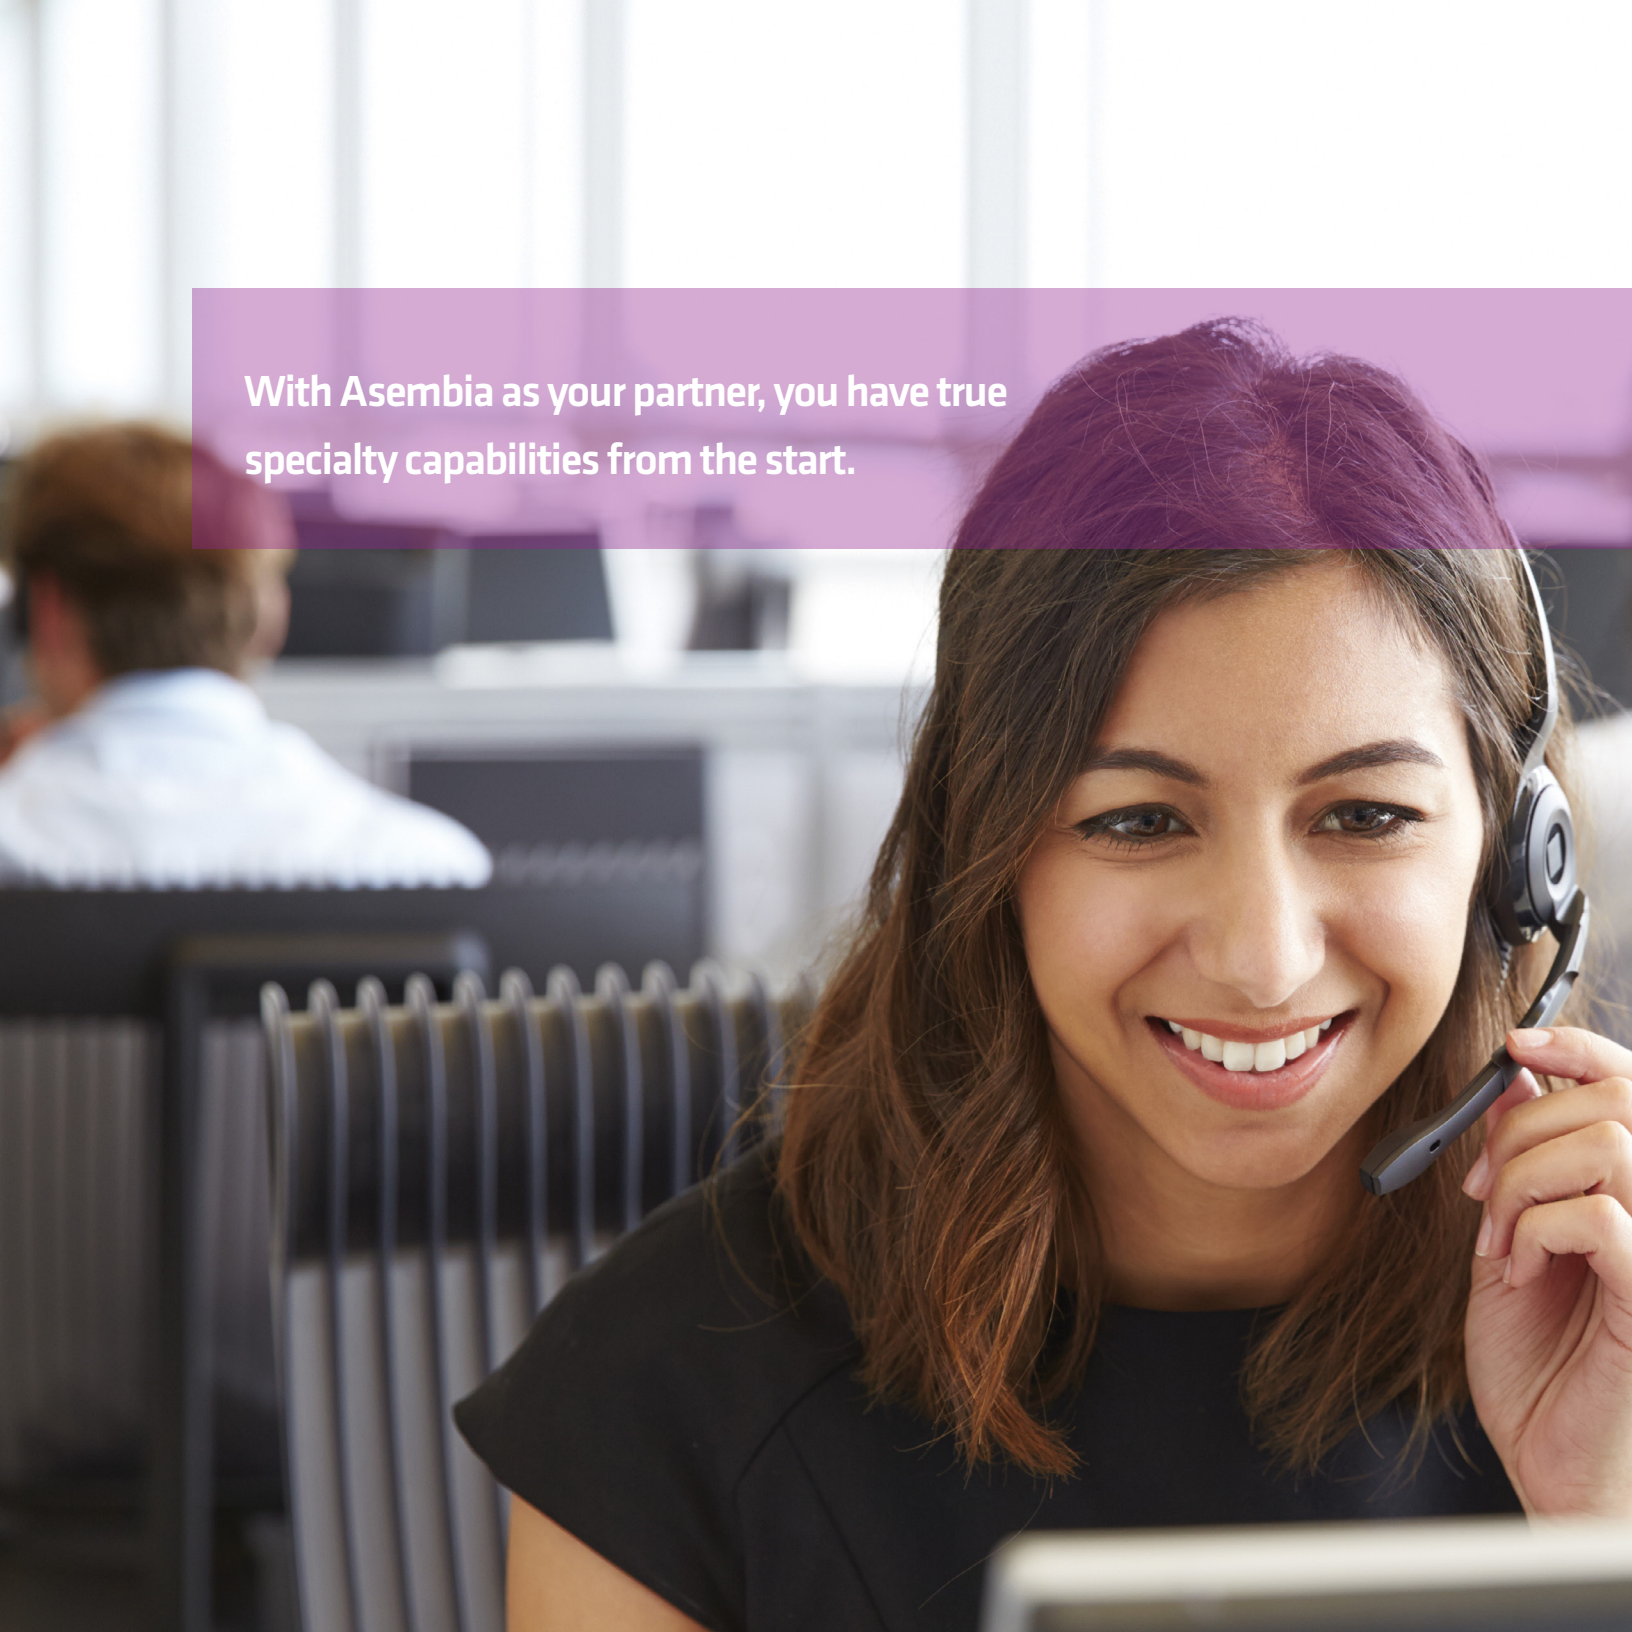

utilizing **outsourced services**, our specialty experts work for you

Asembia offers our pharmacy partners an integrated approach to growth. Asembia provides a comprehensive menu of outsourced core patient services required to successfully and efficiently start, service, and support specialty pharmacy patients. Asembia can either assist or fully support benefit investigation, Prior-Authorization, Appeals, Foundation Assistance, Patient Outreach, and Outcome monitoring.

With Asembia as your partner, you have true
specialty capabilities from the start.
